

# THE EXPERTS FOR eBUSINESS STANDARDS

GEFEG develops solutions for the planning and rationalization of interfaces as support for the electronic handling of business processes.

Our solution offerings support all market participants of eBusiness processes with software, consulting and training.

If you want to create or - perhaps due to new legal requirements - change your specifications, harmonize supply chain data structures or migrate from a proprietary data structure to an eBusiness standard in your industry, GEFEG is your competent partner with many years of consulting experience.

Please contact us if you would like to discuss and develop with us the possible applications and advantages of our products in your company.

## GEFEG.Portal Users

Bits AS Norway, DHL Webchecker, DIN ZUGFeRD-Validation.Portal, ODETTE Schweden, SIX Payment, VDA GEFEG.Validation.Portal, VW Validierungsportal

## OUR PRODUCTS

### GEFEG.FX

eBusiness Interface Design

The desktop software GEFEG.FX streamlines the development and maintenance of eBusiness standards, data models and customer-specific data formats. The use of GEFEG.FX reduces workload and data redundancy and increases the quality and reusability of data in different data exchange formats and standards.

### PORTAL

eBusiness Community Management

The portal streamlines and simplifies the implementation phase, rollout and quality assurance of interfaces by validating news, publishing interfaces and publishing news about changes or new versions of interfaces. It also supports collaboration, e.g. by sharing work statuses or managing and tracking change requests.

### CONTENT

eBusiness Standards & Content

All B2B and EDI standards as well as data models and XML schemas can be managed in our portal.

### SERVICES

Professional eBusiness Services

GEFEG supports companies, organizations and administrations in the design, specification and maintenance of B2B interfaces and data models. We advise companies and organizations on the content of standards-based data structures and support such eBusiness projects.

**FUTURE-PROOF THROUGH INTEGRATION,  
HARMONISATION AND CONSISTENCY**
