B2B/EDI DESIGN TIME PORTAL
THE WORLDWIDE LEADING SOLUTION

GEFEG
Passion for Standards

PORTAL
eBusiness Community Management

The GEFEG.Portal supports the development of interfaces including data harmonization, the management of B2B/EDI communities and the on-boarding process of suppliers and customers and is used by more than 12,000 users.

It streamlines and simplifies the implementation phase, the roll-out and quality assurance of interfaces through validation of messages, publication of interfaces and by publishing news about changes or new versions of the interfaces. It also supports cooperation, e.g. by passing on the work statuses or change request management and tracking.

Features

- Verification of data based on eBusiness standards of an industry, a standard organization or a company
- Networking your community in the cloud with an innovative solution via SaaS or in your own IT landscape
- In cooperation with GEFEG.FX easy development and delivery of guidelines for new messages / new versions / mappings for all standards and company interfaces
- Plug-ins possible, e.g. for the validation of messages via a program interface (RESTAPI) or for the visualization of messages in preparation for archiving
- Self test of the data without partner(s)
- High data quality through validation with syntax and semantic rules even before data exchange
- Customizing for mapping of own requirements and detailed user and rights management
- Adaptation of the web interface to the corporate design possible

FUTURE-PROOF THROUGH INTEGRATION, HARMONIZATION AND CONSISTENCY

Advantages

- Significantly shorter project times
- Significantly lower costs
- Higher quality data exchange with your partners
- Improved interoperability of your IT solutions
- Reduced costs by optimizing the message design and roll-out process
